Custom cords, cables and harnesses

When a standard cord or harness won't do — an unusual length, a special plug, a connector from a specific vendor, a cable in a colour or construction we don't stock — our NPD team develops it with you: drawing, sample, approval, then production on our own lines.

CUSTOM DEVELOPMENT

STARTING POINT	Your drawing, sample, or a description of the application
DEVELOPMENT	Our NPD team confirms construction, materials and components
SAMPLING	Samples built for your approval before any volume
COMPONENTS	Plugs and mouldings made in-house; connectors and terminals from approved vendors
DOCUMENTATION	Drawing, sample approval record and test report per part

What to send us for a quote

- What the part does and where it fits
- Drawing or sample if you have one
- Any standard or customer requirement it must meet
- Expected annual quantity

How we make it

- We discuss the requirement and evaluate it technically.
- Specification and drawing are finalised with you; samples are built and validated.
- On approval we quote, then produce, inspect and dispatch to your schedule.

Typical uses

New appliance models · Export-market plug variants · Equipment with special connectors · Private-label programmes

Made in-house

NPD and sampling · Cable · Moulding · Assembly and test

Every part is built to your drawing. Where a value says "to drawing" or "confirm with us", we fix it with you before sampling. This sheet is generated from the specifications published at https://www.reyanshelectronics.com/products/custom-solutions on 31 October 2026.
